

Module 1: Introduction to Python Assignment - 1

Problem Statement:

Consider yourself to be Sam who is a data scientist. He has been invited as a guest lecturer at a college to take an introductory session on Python.

Tasks to be performed:

- 1. Create a list containing squares of numbers from 1 to 10 (HINT: use List Comprehension).
- 2. Write a Function to check if year number is a leap year.
- 3. Write a Function to take an array and return another array that contains the members of first array that are even.
- 4. Write a Function that takes 2 arrays and prints the members of first array that are present of second array. (HINT: use Membership Comprehension)
